

Next Generation Nationwide Broadband Network (Next Gen NBN) is Singapore's nationwide ultra-high speed all-fibre network. Deployed nationwide to all homes and offices, including schools, commercial properties and hospitals, Next Gen NBN offers broadband speeds of up to 1 Gigabit per second (1Gbps). Users can enjoy a richer broadband experience over the Next Gen NBN, at prices comparable to existing connections.

How Do You Sign Up?

When fibre has been rolled out to your building, you can approach and sign up for Next Gen NBN fibre services with any of the Retail Service Providers (RSPs). They will arrange for the necessary equipment to be installed, and activate your Next Gen NBN connection.

Hand-on Experience At iExperience

The Infocomm Experience Centre (iExperience) takes you on a tour to experience how Next Gen NBN can transform the way you live, work, learn and interact. Immerse yourself in a world powered by Next Gen NBN through interactive and engaging exhibits. Find out more about home networking options and solutions here.

**FINALLY, I CAN
ACHIEVE MORE
THINGS IN LESS TIME.**

**NEXT GEN NBN.
OPTIMISING PERFORMANCE
WHEN I NEED IT.**

In the highly competitive business world, higher speed can keep you ahead. With Next Gen NBN, you can enhance your business performance and reach out to more customers faster and better than before.

Improve Business Productivity

With the ultra-fast broadband speed, work has never been easier or more efficient. Access office applications with ease wherever you are; share huge multimedia files with your colleagues; and hold high quality video-conferences with business associates. The possibilities are endless with Next Gen NBN.

Enjoy More Choices

With more service providers and a wider array of innovative services and competitive plans, you can take advantage of infocomm technologies to bring your business to the next level.

Get Better Value

Next Gen NBN supports a myriad of services that can help you offset your cost in business while providing better value. For example, businesses can use cloud computing to enjoy the lower upfront capital investment in equipment or even share one connection for different services such as POS, VOIP and Internet, without losing performance.

Extend Your Reach

With Next Gen NBN, you can reach out to more customers without compromising customer experience. Go ahead and stream product videos or service demos with confidence. Your customers and partners can get connected at the same time without any compromise on quality!

What Enterprises Need to Know About Next Gen NBN

One Network, Multiple Service Providers

With a wide selection of Retail Service Providers (RSPs) providing a broad range of fibre-based broadband access plans and value added services, there is always a plan to suit your business needs.

Quality of Service

RSPs are able to make use of different quality of service provided by providers on Next Gen NBN to meet needs of companies who may have more stringent requirements, e.g. delivering high quality video-conferencing or real-time stock feeds and charts.

Availability

Next Gen NBN has been designed and deployed in line with international security practices, and is monitored round the clock by qualified engineers, giving companies the confidence to focus on your core business.

Office Networking & Migration

In most cases, existing network equipment and devices can be reused when migrating to the Next Gen NBN with minimal or no disruption to your operations, services and customers. Some new equipment may be required to take advantage of the faster speeds over the Next Gen NBN. Contact your system integrator or RSP for advice on a suitable migration plan that meets your business needs.

Service and Support

For after-sales service and technical support, please contact your preferred RSP for assistance.
